buttress thread

two enlarged
stem seals

integrated fastening system
with threaded inserts

highly dynamic
backing seal

Designed für ISO, ANSI, BS, JIS

The system at a glance

The complete program

for a sophisticated system

The 546 ball valve is yet another innovative product from GF Piping Systems; it comprises extensive know-how and the latest technology. A broad spectrum of product features provides you with quality, flexibility, reliability, as well as modularity.

We have expanded our program from DN65 to DN100 – available in the

materials PVC-U, PVC-C, ABS and PP-H. We have the right ball valve for all of your industrial applications. Internationality is also given with connections for all standards, such as ISO, ANSI, BS and JIS.

From manual valve to control valve:

The 546 ball valve is extremely versatile. From the no-frills standard

version to the practical actuated version, we have a model to fit your needs and a wide range of accessories to choose from. Even the manual version has additional options sure to interest you, such as an integrated fastening system and a

lockable lever with indexing. The multifunctional module provides feedback on the «open/closed» valve positions in a variety of signals. It also serves as an interface for electric or pneumatic actuators. So you see: Multifunctionality is on the agenda.

Standard Ball Valve

Ball Valve with lockable index lever; optional electric feedback

Ball Valve with fine adjustment

Ball Valve with pneumatic actuator – double acting; optional manual override

Ball Valve with electric actuator
